

FOR THE WORLD'S TOUGHEST DEMANDS

We specialize in engineering custom stainless-steel vessels and modular process systems designed to meet the most demanding requirements. With over 20 years of experience, we deliver solutions tailored to industries ranging from wine and food processing to aerospace and pharmaceuticals.

Our ASME-certified pressure vessels, state-of-the-art fabrication, and expert craftsmanship ensure unmatched reliability and performance. Whether it's a fermentation tank as unique as your vintage or a cleanroom solution for pharmaceuticals, we are more than manufacturers—we are partners in your success.

CORE COMPETENCIES

ENGINEERING

Custom vessel design, SolidWorks, and FEA analysis.

FABRICATION

Laser and water jet cutting, MIG/TIG welding, machining, forming, polishing, and dimple heating/cooling jackets.

QUALITY ASSURANCE

ASME U, API, UM, and H stamps; UL and DOT-certified; National Board R stamp.

INDUSTRIES SERVED

Wine
Distilled Spirits
Food
Beverage
Dairy
Water & Wastewater
Healthcare
Personal Care and Cosmetics
Aerospace
Bioreactors and Fermentation
Pharmaceutical
Chemical and Industrial

OUR WORK

PROCESS VESSELS AND SKIDS

Sanitary vessels and skids for blending, mixing, and processing, custom-built for food, beverage, and pharmaceutical needs.

Pharmaceutical Nutraceutical Bio-Tech
